

Full Stack Web Development – Task 1 (2026)

Professional Portfolio Website

This project is a Personal Professional Portfolio Website developed as part of the Future Interns Full Stack Web Development Internship Task. The main objective of this project is to create a responsive and modern portfolio website that showcases personal skills, projects, education, certifications, and contact information professionally.

Project Objective

- *Build a professional developer portfolio.*
- *Showcase technical skills and projects.*
- *Create a responsive UI for mobile and desktop.*
- *Add contact functionality for recruiters and clients.*
- *Deploy the website online using GitHub Pages or Netlify.*

Technologies Used

Frontend: HTML5, CSS3, JavaScript, React.js

Backend (Optional): Node.js and Express.js

Database (Optional): MongoDB

Deployment: GitHub and Netlify

Website Sections

- 1. Home Section – Introduction with profile details.*
- 2. About Section – Skills, education, and goals.*
- 3. Projects Section – Internship projects and mini projects.*
- 4. Resume Section – Downloadable resume option.*
- 5. Contact Section – Contact form with email links.*

Key Features

- ✓ *Responsive Design*
- ✓ *Interactive UI Components*
- ✓ *Smooth Navigation*
- ✓ *Modern Portfolio Layout*
- ✓ *SEO Friendly Structure*
- ✓ *GitHub and LinkedIn Integration*

Folder Structure

portfolio-website/

■■■ *public/*

■■■ *src/*

■ ■■■ *components/*

■ ■■■ *pages/*

■ ■■■ *assets/*

■ ■■■ *App.js*

■■■ *package.json*

■■■ *README.md*

Sample React Component

```
function Home() {  
  return (  
    <div>  
      <h1>Welcome to My Portfolio</h1>  
      <p>Full Stack Web Developer</p>  
    </div>  
  );  
}
```

Deployment Steps

1. *Push source code to GitHub.*
2. *Connect repository with Netlify or Vercel.*
3. *Configure build settings.*
4. *Deploy the website and generate live URL.*
5. *Share portfolio on LinkedIn and resume.*

Conclusion

This portfolio website project improves frontend development skills, responsive design understanding, project presentation, and professional online presence. The project can help in getting internships, freelance opportunities, and full-time developer roles.
